Project management

ABOUT ME

I am a dedicated medical doctor with valuable experience acquired during the COVID-19 pandemic, where I effectively contributed to patient care in a high-pressure environment. My training alongside a Forensic and Anatomic Pathologist in a diagnostic laboratory has equipped me with essential skills in pathology and laboratory medicine. Currently, as a faculty member at a medical school, I am passionate about education and committed to mentoring the next generation of healthcare professionals through dynamic and practical teaching methods.
